DETAILED ACTION

Response to Amendment

Claims 11-20 are pending.

Claims 1-10 have been canceled.

The 35 USC 102 rejection of claims 1,2 and 5 is withdrawn based on applicant's amendment filed on November 8, 2004.

Allowable Subject Matter

Claims 11-20 are allowed.

The following is an examiner's statement of reasons for allowance:

After reviewing applicant's amendment, arguments and conducting an updated search none of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited structural combination of independent claims 11,12,15,17,19 and 20.

Regarding claims 11-14,

None of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited limitations of independent claims 11,12, where the structural combination in particular, the cavity with the gain medium, the tuneable spectral filter, frequency shifter and single mode fiber doped with rare earth, thereby providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Regarding claims 15 and 16,

Art Unit: 2828

None of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited limitations of independent claims 15, where the structural combination in particular, the cavity with the gain medium, the tuneable spectral filter, frequency shifter and an output coupler having one narrow bandwidth optical filter, thereby providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Regarding claims 17 and 18,

None of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited limitations of independent claims 15, where the structural combination in particular, the cavity with the gain medium, the tuneable spectral filter, frequency shifter and independently controlling the tuneable spectral filter, thereby providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Regarding claim 19,

None of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited limitations of independent claims 19, where the structural combination in particular, the cavity with the gain medium, the tuneable spectral filter, frequency shifter and an array of environmentally-sensitive narrow-band reflectors, thereby providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Regarding claim 20,

None of the cited prior arts alone or in combination discloses the claimed broadband laser having the recited limitations of independent claims 19, where the structural combination in particular, the cavity with the gain medium, the tuneable spectral filter, frequency shifter and at least one interferometer, thereby providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
